

## Exercise: Build a Webpage

### Instructions:

1. Add the DOCTYPE declaration
2. Specify the character encoding (charset="utf-8")
3. Title the document, "Rainforests"
4. Add the body tags

### Between the body tags:

5. Create a header that reads, "The Largest Rainforests in the World"
6. Next, create a sub-header that reads, "The Amazon"
7. Add the following paragraphs under the sub-header:

The Amazon, otherwise known as the Amazon Jungle or Amazonia, is the largest tropical rainforest in the world, covering most of the Amazon Basin of South America. The Amazon covers an area of 1.7 billion acres and is home to many species, including Brazil, Peru, Colombia, Ecuador, Bolivia, Guyana, Suriname, and French Guiana. However, the majority of the rainforest is located in Brazil.

The Amazon's wet tropical forests contain a species-rich community of plants and animals. In fact, the Amazon rainforests have unparalleled biodiversity. One in ten known species in the world lives in the Amazon.

Below are a few animals that live in the Amazon:

8. Under the last paragraph, add the following unordered list:

- Poison dart frog
- Jaguar
- Sloth
- Spider Monkey
- Pink river dolphin

9. Insert a horizontal break after the unordered list
10. Create another sub-header that reads, "The Congo"

ist listed below:

Nile River: 4,130 miles; 6,650 kilometers

Congo River: 2,920 miles; 4,700 kilometers

Lualaba River: 1,200 miles; 1,800 kilometers

- To assist with viewing the colspans and rowspans properties, we are going to add a little bit of CS For the purpose of this exercise, use the following syntax for your opening table tag:

```
<table border="1">
```

- The image below illustrates the desired table layout.

Rivers in the Congo Rainforest	
River	Length
Nile River	4,130 miles
	6,650 kilometers
Congo River	2,920 miles
	4,700 kilometers
Lualaba River	1,200 miles
	1,800 kilometers

13. Under the table, insert an absolute link that will direct to the website link below. The link should say "about the Nile River"

<https://www.nationalgeographic.org/encyclopedia/nile-river/>

14. Next, insert a link break under the absolute link

15. Insert a comment under the line break that says:

The Daintree Rainforest and Southeast Asian Rainforest sections have been

16. Under the comment, insert an anchor link that brings us back to the top of the webpage.

- Create an anchor entitled "top" and place it at the top of the webpage above the first header
- Create the link that directs to the anchor on the top of the page and place this at the bottom of the
