Resume

Welcome to *Responsive Web Design*

This course will introduce you to Responsive Web design (RWD) and covers basic principles and foundational techniques for designing websites that are viewable on all devices. The course assumes that the learner has at least a basic understanding of HTML and CSS, though the course will include some brief review where applicable. In this course, you will learn how to create custom CSS layouts and use media queries to optimize websites for different screen sizes.

Here are some tips for navigating and getting help as you progress through the course:

How do I navigate?

There are two ways to navigate the course:

1. The left navigation pop-out, or
2. The Next and Previous buttons on the bottom of each page.

What are the completion requirements?

To earn your credits and certificate of completion, you must:

1. View each assignment in the course, earning a green checkmark in the left navigation, and
2. Score a minimum of 70% on any weight-bearing test. Tests used to compute your final course grade are flagged on the test home page.

What if I need help?

Access a MindEdge subject matter expert by submitting a question through the Ask The Expert feature under Tools. We will connect you with an expert in the field you're studying!

Some other useful tools in the course include:

- **Search**—Find any keyword on any page.
- **Progress**—Keep track of where you are and how much further you have to go.
- **Appearance**—Increase font size as you'd like.
- **Mobile app**—Download MindEdge's free mobile app to access course games, audio files, videos, and assessments whether online or offline.
